

Prisha Sharma

ps1494@srmist.edu.in | +91 9217845866 | GitHub | 2027 Batch

Summary

Analytics-focused B.Tech Artificial Intelligence student with hands-on experience in time-series forecasting, machine learning, and Python-based automation. Proven ability to build scalable data-driven solutions through Big4 internship experience, improving forecasting accuracy and business decision-making.

Education

SRM Institute of Science and Technology	2023 – 2027
B.Tech in Artificial Intelligence	CGPA: 8.92/10

Army Public School, BB Cantt, Srinagar	2023
Class XII (CBSE, PCM)	84%

St. Mary's Convent High School, Kanpur	2021
Class X (ICSE)	91%

Experience

Ernst & Young (EY)	May 2025 – Aug 2025
<i>AI/ML Intern</i>	

- Built a surrogate SKU recommendation system using cosine similarity and clustering, improving new product forecast accuracy by **18%**.
- Developed automated time-series forecasting pipelines (Prophet, ARIMA) for 10+ SKUs, reducing manual effort by **40%**.
- Performed trend and seasonality decomposition to enhance model interpretability and stakeholder trust.

CSEXPLAINED	Feb 2025 – May 2025
--------------------	---------------------

Analytics Intern

- Analyzed engagement and outreach data across partnerships, enabling structured reporting and performance tracking.
- Collaborated with cross-functional teams to improve operational efficiency using data-driven insights.

Projects

Surrogate SKU Recommendation & Forecasting System	2025
<i>Python, Pandas, NumPy, Scikit-Learn, Prophet</i>	

- Designed ML-based pipeline to identify surrogate products using similarity models and clustering.
- Implemented forecasting models to capture demand trends and seasonality for new SKUs.
- Automated reporting workflows, improving decision-making efficiency.

Meal Planning System	2024
<i>Python, Flask/Django, SQL, HTML/CSS</i>	

- Built a personalized meal recommendation system with automated grocery generation.
- Developed backend logic with database integration for structured data processing.

Stock Price Prediction Model	2025
<i>Python, XGBoost, Yahoo Finance API, NLP</i>	

- Developed stock prediction pipeline using machine learning and sentiment analysis.
- Reduced RMSE compared to baseline models and visualized trends using Plotly.

Research Work

AI-Driven Market Regime Detection and Index Forecasting

- Designed ML pipeline for financial time-series forecasting with regime detection.
- Achieved **52% directional accuracy** using cross-validation techniques.
- Currently working on backtesting, risk evaluation, and research publication.

Skills

Programming: Python, C++

Machine Learning & AI: Supervised Learning, Unsupervised Learning, Time Series Forecasting, Regression Models, Clustering (K-Means, Hierarchical), Feature Engineering, Model Evaluation, Hyperparameter Tuning

Data Science & Analytics: Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Forecasting, Data Visualization, Business Analytics

Time Series & Forecasting: ARIMA, SARIMA, Prophet, Trend & Seasonality Decomposition, Forecast Evaluation (MAPE, RMSE)

Libraries & Frameworks: Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn, XGBoost, Plotly

Tools & Technologies: SQL, Excel, Power BI, Git, API Integration, Jupyter Notebook

Backend & Databases: Flask/Django, SQLite, MySQL

Other Concepts: Cosine Similarity, Recommendation Systems, Optimization Logic, Automation Pipelines

Leadership & Activities

Head Girl

Apr 2022 – Mar 2023

Led student administration, discipline, and large-scale event coordination.
